Dear Esteemed Guests, Distinguished Colleagues, and Partners in Healthcare,

With great pleasure and honour, we extend a warm welcome to each one of you to the **3rd Edition of the Annual BMC Chhattisgarh Cancer Conclave, 6th edition of ecancer Choosing Wisely India 2025**, 2nd edition of “**Common Sense Oncology (CSO) India**” and 2nd year of Nursing Conclave in collaboration with Oncology Nursing Association of India. The meeting this year will focus on Gastrointestinal, Genitourinary and Lung cancers which are rising at an alarming rate especially in younger population. This will be a meeting ground for global, national and regional experts to brainstorm, network for better patient care and takeaway valuable insights back to their workplace.

The meeting is scheduled for 19th -21st September 2025 in the serene and picturesque premises of Mayfair Lake Resort, Naya Raipur, Chhattisgarh. In conjunction with the conference, multiple workshops are planned to drive the theme of CSO and address the crucial knowledge gaps and training needs in cancer care.

The ecancer global foundation (ecancer) is a UK based charity that has democratized education for the global cancer community. Working in partnership with Vedanta Medical Research Foundation-Balco Medical Centre, we are honoured to invite you to the meeting which will help support continuing medical education. We encourage physicians, nurses, clinicians, researchers as well as patients, survivors and advocates in any aspect of oncology to attend the meeting. It is only through a diverse exchange of knowledge that we can offer the best care to our patients both now and in the future.

Our heartfelt gratitude to all the esteemed professionals nationally and internationally who so generously have agreed to share their time, expertise, and knowledge.

Looking forward to your enthusiastic participation. Thank you

Warmly,

Dr Yashwant Kashyap

Track 3: Mini ACORD : Research Workshop

Venue: Chitrakoot, Mayfair Lake Resorts

High-quality clinical cancer research begins with a well-developed protocol. The Mini ACORD Research Workshop is designed to equip early-career oncology researchers with the knowledge, skills, and mentorship needed to turn promising ideas into robust, feasible research studies. It brings together participants with new research concepts and pairs them with national and international experts who share their expertise, guidance, and global perspectives.

The workshop follows a problem-based, participant-centered learning approach. Short, interactive lectures are combined with small-group sessions where participants work through real protocol development challenges in oncology sub-specialties. By the end of this immersive day, participants will leave with a refined research concept, practical tools for protocol development, and valuable connections to support their future research journey

Track 4: Women For Oncology (W4O) – Network Meeting

Venue: Ballroom, Mayfair Lake Resorts

Women encounter challenges at multiple stages of their careers, and this is particularly evident in the underrepresentation of female oncologists in leadership roles. With this meeting, we aim to not only shed light on these challenges but also to actively address the barriers that hinder female oncologists from advancing to leadership positions.

Recognizing the issue is the first step; we must then raise awareness and create a supportive environment where both men and women can thrive. Education and mentorship play critical roles in empowering women to pursue leadership opportunities. By inspiring and supporting female oncologists, we can create a more inclusive and equitable landscape in the medical field. This meeting is a step towards building a future where leadership in oncology reflects the diversity and talent within the field.

Track 11: Communication Skills Workshop

Venue: Ballroom, Mayfair Lake Resorts

Oncologists are often required to discuss complex information about prognosis and guide patients and families through some of the most difficult moments, including end-of-life decisions. These conversations not only demand medical knowledge but also empathy, sensitivity, and clarity.

This workshop is designed to equip oncologists with the skills to navigate such discussions with confidence and compassion. Through interactive sessions and practical insights, participants will learn strategies to communicate prognosis honestly yet sensitively, support patients and caregivers in decision-making, and provide comfort in end-of-life care.

Track 12: Choosing Wisely - Cancer Prevention Workshop

Venue: Chitrakoot, Mayfair Lake Resorts

Cancer prevention begins with health awareness, early detection, and timely action and frontline health workers are at the heart of this effort. As the backbone of a strong healthcare system, they play a key role in identifying cancer early and preventing its progression. Early detection through screening allows for timely treatment of precancerous lesions, stopping them from developing into cancer. This workshop is designed specifically for frontline workers, giving them the knowledge, skills, and confidence to promote cancer prevention and early diagnosis in their communities.

Through an interactive, participant-centered approach, the workshop will cover exemplars for implementing cancer control programs locally. Physicians, state health officers and oncologists will learn how to guide people through available screening programs, support follow-up care, connect them with community resources, and strengthen timely referrals.

Track 13: Hands-On Contouring Workshop on SBRT

Venue: BALCO Medical Centre – 3rd Floor

This hands-on workshop is designed to give participants practical exposure to the principles and practice of SBRT, with a special focus on hepatocellular carcinoma and pancreatic malignancies. Through expert-led lectures, interactive discussions, and live contouring demonstrations, the workshop will cover motion management techniques, evidence-based outcomes, indications, and organ-at-risk (OAR) contouring.

By combining theory with live case-based contouring, the aim is to strengthen participants’ confidence and competence in adopting SBRT safely and effectively in their clinical practice.
